

A.T.P BLUE

A.T.P BLUE is a sterile solution of trypan blue
A.T.P. BLUE is a selective tissue staining agent
to use as a medical aid in ophthalmic surgery
by staining the anterior capsule of the lens.

A.T.P Blue is used:

- As an aid in ophthalmic surgery
- As a staining agent
- Anterior/Posterior Capsulotomy
- Phacemulsification

Contraindications
A.T.P. BLUE® (trypan blue) is contraindicated when a non-hydrated (dry state), hydrophilic acrylic intraocular lens (IOL) is planned to be inserted into the eye because the dye may be absorbed by the IOL and stain the IOL.
