
A.T.P BLADE
ATP BLADE CATARACT KNIVES
These products are microsurgery knives which are used for ophthalmic surgery and are for single use only. The precise incisions achievable with these knives are among the preconditions for application of delicate ophthalmic surgical interventions.
Advanced A.T.P Blades are designed to enhance control and precision in a broad range of surgical procedures. New features are designed to make ATP BLADE easier and safer to use.
Material
Blade: Stainless Steel
Handle: PET
Blade Tip Coating: Silicon
Each ATP knife is individually packed in a case and sealed in a pouch to ensure sterility. These products are sold in boxes of 5.
Main blades shape:
